

Home care for people with suspected or confirmed COVID-19

Take care of yourself and your family

All members of the household

Wash hands with soap and water regularly, especially:

- after coughing or sneezing
- before, during and after you prepare food
- before eating
- after using the toilet
- before and after caring for the ill person
- when hands are visibly dirty

Avoid unnecessary exposure to the ill person and avoid sharing items, such as eating utensils, dishes, drinks and towels.

When coughing or sneezing, cover mouth and nose with flexed elbow or use a disposable tissue and discard immediately after use.

Monitor everyone's health for symptoms such as fever, cough and if difficult breathing appear, call your health care facility immediately.

Home care for people with suspected or confirmed COVID-19

Take care of yourself and your family

For ill people

If you are ill with fever and cough

Clean hands frequently with soap and water or with alcohol-based hand rub.

Stay at home; do not attend work, school or public places. Rest, drink plenty of fluids and eat nutritious food.

Stay in a separate room from other family members, but if not possible wear a medical mask and keep a distance of at least 1 meter (3 feet) from other people. Keep the room well-ventilated and if possible use a dedicated bathroom.

When coughing or sneezing, cover mouth and nose with flexed elbow or use disposable tissue and discard after use. If you experience difficulty breathing, call your health care facility immediately.
